# Critical care, anywhere. Since 1985.

It all began when a pregnant woman from a rural community died from blood loss, leaving a father alone with their newborn. For STARS' founders, her death was one too many. Something had to be done.

As we've grown and evolved, STARS has never wavered from our mission. Fundamentally we believe that where you live — or work, play and travel — shouldn't impact your chance of survival.
